Stephen:

Attached are my comments. Nothing significant just word smithing.

I am sure I don't need to tell you this but you need to get a pretty good estimated volume of oily waste in the tank(s) and get them profiled (sample/analysis) for disposal. The volume estimate and sampling should take almost no time. Remember, the material has to be sent to a CERCLA approved facility.

Please let me know the anticipated schedule for this and the remainder of the activities anticipated under the removal action.

Thanks
